Department of Zoology

Field trips

Students learn better when they team up and field trips give them a chance to work together on things, which helps them learn how to collaborate. It can be hard for some students, especially if they're new to the colleges or find it tough to talk to their classmates but field trips help them learn how to work as a team.

2019-2020

In our institution our zoology department conduct a field trip on 19.02.2020 .in this programme we have visited near by pond at Thanikella village which is 1km distance from our college.

In this visit students have observed the biotic and abiotic factors in the pond ecosystem.

They have observed the aquatic food chain.

2022-2023

In our institution our zoology department conduct a field trip on 20.08.2022 .in this programme we have visited Peddha vagu project which is located in aswaraopeta mandal which is 4km distance from our college.

In this visit students have observed the biotic and abiotic factors in the pond ecosystem.

They have observed the aquatic food chain.

2024-2025

In our institution our zoology department conduct a field trip on 09.01.2025 .in this programme we have visited PHC -Peddhavaagu project which is located in aswaraopeta mandal which is near to our college.

In this field visit students hav observed how the Blood grouping test will conduct,how the hemoglobin levels will measure.
