- Every day they managed all the work related to manure preparation.
- The compost prepared will be used for plans in our garden.

Proofs & Documents attached. Notice & Letter:

News clips: YES

Student list participant: 10

Photos: Yes

Feedback: Student: we experienced how earth worms are friendly to the farmer. This was real time experience for us.

Notes: This activity was taken up to familiarize the organic manure preparation to students. Naturally prepared manure gives more benefits to the farmer. To bring awareness among the students about fertilizers pesticides and how harmful they are for human life and to earth.
