

# INDUCTION PROGRAMME

This induction program is intended for first year students to explain about college and its rules and regulations to the students and their parents. The principal and faculty will explain about their respective departments. The program aimed to welcome students, introduce them to the college community, and provide essential information.

The program included an inaugural ceremony, academic orientation, campus tour, workshops and cultural events. Students were introduced to faculty members, staff, and existing students. The students in charge and vice principal will explain about the day in college, how it's gonna be, about its rules and regulations like college timings and what are the activities that we conduct in the college like different clubs, committees and also about labs and infrastructure.

The program achieved its objectives, with students feeling welcomed and comfortable in their new environment. They gained a better understanding of academic policies and developed essential skills like team work and communication.

Overall, the induction program was a success, and we are confident that it has helped our new students settle in to college life.
