# Acid rain

Before and After effects of acid rain on the Taj Mahal

**Robert Angus Smith** [FRS](#) (15 February 1817 – 12 May 1884) was a Scottish [chemist](#), who investigated numerous [environmental issues](#). He is known for his research on air pollution in 1852, in the course of which he discovered what came to be known as [acid rain](#).

According to the Royal Society of Chemistry, which considers him the “father of acid rain,” the word acid rain was invented in 1852 by Scottish chemist Robert Angus Smith. Smith decided on the word while studying rainwater chemistry near industrial towns in England and Scotland.
