Theme of STEM Clubs:

STEM → Science, design & technology,

mathematics, engineering and computing clubs.

☉ The main theme of the STEM's club is to enrich subject knowledge to enhancing & revitalising teaching skills.

Club leaders gain increased confidence and enthusiasm in their ability to teach STEM subjects in new & exciting ways.

▲

A club leader can help students relate to STEM subjects by using real-world contexts & role models which can improve engagement.

AFC

Dispersion of light:-

It can be defined as the splitting of white light when it passes through a glass prism into its constituent spectrum of colours (i.e. violet, indigo, blue, green, yellow, orange, red). Dispersion is the distribution of wavelengths that is exactly happening in the figure above.

Activity-I Making a rainbow.

Objective:

In this activity students will see white light split in to the different colours of the rainbow. Students will explore the real-world conditions needed to create a rainbow and how these relate to the light spectrum.

Method:

Two thirds fill the jar (or) bowl with water & place on a white surface. Careful place the mirror in the water & angle the torch so that the light reflects off the mirror. Alter the angle of the mirror & torch to find the best result & use the white card to show the rainbow.
